Projects

MERN Stack
Technologies Used: MongoDB, Express.js, React, Node.js, JavaScript, HTML, CSS
Project Description: Developed a full-stack App using the MERN stack, allowing users to efficiently create, manage a web interface.
Key Features:
- **User Authentication**: Implemented user registration and login with session-based authentication.
- **Responsive UI**: Designed and built a responsive front-end with React for an engaging user experience.
- **CRUD Operations**: Created RESTful APIs with Express.js , retrieval, updating, and deletion.
- **Database Management**: Used MongoDB for storing and managing task data, with Mongoose for schema management.
Responsibilities:
- Developed front-end components and integrated them with back-end services.
- Created RESTful APIs and connected them with MongoDB for data management.
- Designed a responsive layout for compatibility across various devices.
