RELEVANT PROJECTS

PetVet (FitPez), *Technology Used: React, Node, MongoDB ,Git* 2025

- Leading the development of PetVet (FitPez), a veterinary/clinical management web application.
- Built the admin panel and designed the complete UI using React and Tailwind CSS, ensuring a clean and responsive layout.
- Appointment management with search, filters, and pagination.
- Profile and background image uploads with API integration.
- Dashboard with diagnostic categories, treatment history, and notes section.
- Multilingual support, privacy settings, and Instagram-like features for better user engagement.
- Chat, notifications, and follow/unfollow functionality to enhance communication.

SNUSLIFE, *Technology Used: Next Js* 2025

- Managed full-scale migration of the SNUSLIFE platform from React.js to Next.js to improve SEO and page load speeds. Refined codebase architecture to increase scalability and maintainability.

AUDIENCE POOL, *Technology Used: React, Node, MongoDB, Git* 2024

Role: Web Developer

- Real-time Chat & Notifications: Integrated live messaging and alerts for user interactions.
- Follow/Unfollow System: Developed dynamic user engagement functionality.
- Image Uploading: Enabled secure and efficient media management.
- Settings Page: Built a customizable settings interface for user preferences.
- Wallet System: Implemented a digital wallet with an "Add Money" feature for seamless transactions.
- Multi-language Support: Integrated localization to enhance global accessibility.

TASTE TRIBE, *Technology Used: React, Node, MongoDB* 2023

Role: Web Developer

- Implemented CRUD operations for products, manufacturers, agents, and chefs, ensuring comprehensive data management.
- Utilized Ant Design for CSS styling and React.js for frontend development, coupled with Node.js for backend logic implementation.
